## SKILLS

**Languages:** C++, Java, JavaScript, TypeScript, SQL

**Technologies & Tools:** React, Next.js, React Native, Node.js, Express, Prisma, Firebase, PostgreSQL, SQLite, Docker, Git, TailwindCSS, n8n

## WORK EXPERIENCE

### SOSER (Freelance / Open Source Project)

Jan 2025 – Present

*Full-Stack Developer*

- Designed and developed a secure service platform for SOSER, integrating user authentication, database management, and responsive UI.
- Implemented robust data models with Prisma and PostgreSQL for scalability and reliability.
- Collaborated on system architecture and deployed the application using Docker and cloud hosting.
- Stack: Next.js, Node.js, Express, Prisma, PostgreSQL, Docker, Firebase.

### Freelance / Personal Projects

2024 – Present

*Full-Stack Web & App Developer*

- Built a **Real-Time Messaging App** using React, Node.js, Express, Socket.IO, and RSA encryption, enabling secure end-to-end communication.
- Developed an **AI-Powered Gallery App** with Next.js, Prisma, Clerk authentication, Firebase, and Vercel AI SDK, allowing users to generate and manage AI-driven image collections.
- Created a **QR Code Authentication Service**, a third-party platform enabling developers to integrate secure QR-based login flows into their applications.
- Built a **Gym Management App** where users can access curated YouTube workout videos, create custom categories, and track progress effectively.
- Developed a **Clinical Management App** to streamline patient data entry, scheduling, and health record tracking, improving usability for healthcare workers.
- Created the **BrowseMind Chrome Extension**, an AI-powered productivity tool that provides smart suggestions and content summaries while browsing, enhancing focus and workflow.
- Tech stack included React, Next.js, React Native, Node.js, Prisma, PostgreSQL, SQLite, Firebase, TailwindCSS, Docker.

## EDUCATION

### Deber Markos University

2023 – 2027

B.Sc. in Software Engineering

3.75

Relevant Coursework: Software Engineering Principles, Object-Oriented Programming (C++/Java), Database Management Systems, Data Structures & Algorithms, Web Development, Mobile App Development, Operating Systems, Computer Networks, Microprocessor and Assembly Language Programming

## PROJECT WORK

- Clinical App:** Built a secure and user-friendly clinical management application to streamline patient records, appointments, and prescriptions. Designed the database schema, implemented authentication, and developed both frontend (React) and backend (Node.js, Express, PostgreSQL with Prisma).
- BrowseMind Chrome Extension:** Created a productivity-focused browser extension that helps users save, categorize, and manage web content. Added features like keyword tagging, quick search, and sync across devices.
- Hulugebeya:** founder a collaborative platform with friends to enable users to share, manage, and track community-driven projects. Led the full-stack development, implementing React for frontend, Node.js and Express for backend, and PostgreSQL with Prisma for database management. Integrated user authentication, real-time updates, and a responsive UI to ensure seamless collaboration and engagement.

## AWARDS AND CERTIFICATES

- Mentor at SOSER:** Guided students and peers in coding, problem solving, and software development best practices, contributing to successful project completions.
- Web Development Nanodegree (Udacity):** Completed comprehensive full-stack web development training, including React, Node.js, Express, and database management with SQL and Prisma.
- Android Development Nanodegree (Udacity):** Gained hands-on experience building Android applications with Kotlin, integrating APIs, and managing persistent data with SQLite.
